UTF-8 Mathematical Operators

Range: Decimal 8704-8959. Hex 2200-22FF.

If you want any of these characters displayed in HTML, you can use the HTML entity found in the table below.

If the character does not have an HTML entity, you can use the decimal (dec) or hexadecimal (hex) reference.

Example

```
<p>I will display &sum;</p>
<p>I will display &#8721;</p>
<p>I will display &#x2211;</p>
```

Will display as:

```
I will display ∑

I will display ∑

I will display ∑
```

Older browsers may not support all the HTML5 entities in the table below.
Chrome has good support. But (currently) only IE 11+ and Firefox 35+ support all the entities.
